

Vipin Kumar Yadav

Python & Java Backend Developer

India | codervipin@gmail.com | +91-7009257546

[GitHub](#) | [LinkedIn](#)

Skills

Programming Languages: Python, Java, JavaScript

Backend Development: REST API, OOPs, JWT Authentication, FastAPI, API Integration, Redis

Web & Automation: HTML, CSS, JavaScript, Django, Flask, FastAPI, PyAutoGUI, Screen Automation, OpenCV

DevOps & Deployment: Docker, GitHub Actions, Amazon EC2, Linux, CI/CD Pipeline, NumPy, Pandas, PyTorch

Projects & Experience

AI Chatbot

- Developed an AI chatbot using Python and FastAPI with REST API communication and response handling.
- Used PyTorch for AI/NLP-related functionality and deployed the project using Docker on Amazon EC2.
- Configured CI/CD deployment workflow using GitHub Actions for automated builds and deployments.

Screen Automation System

- Built an automation system using Python automation libraries with screen monitoring, pixel detection, and automated actions.
- Used NumPy and OpenCV for image processing tasks to automate workflows for repetitive screen-based tasks.
- Implemented REST API automation and integrated OpenCV for advanced image recognition capabilities.
